KOCAELI UNIVERSITY

2017 - 2021
Kocaeli, Turkey

Bachelor of Information Systems Engineering

College of Information Technology - VSITE

2020 - 2021
Zagreb, Croatia

Erasmus+ exchange

WORK EXPERIENCE

Android Developer
Buckaroo LLC
Pristina, Kosovo
07/2023 - 10/2024

Mid Android Developer
Gjirafa Inc.
Pristina, Kosovo
07/2022 - 07/2023

Junior Android Developer
Async Labs
Zagreb, Croatia
01/2022 - 07/2022

Software Engineer Intern
DigiNova Technologies
Kocaeli, Turkey
10/2021 - 01/2022

Software Engineer Intern
Kocaeli University
Kocaeli, Turkey
06/2019 - 09/2019

SKILLS

Technical Skills
- Kotlin
- Java

Android Development
- Android SDK
- MVVM, MVI, Clean Architecture
- Dagger Hilt, Koin
- Coroutines & Reactive Programming
- SQL, noSQL, ROOM, Firebase
- REST APIs
- Jetpack Compose, XML
- Unit Testing

Additional Skills
- Git & Git workflow
- CI/ CD
- Google APIs & Play Console
- Agile methodologies
- Android UI/UX design principles
- Third party libraries
- Kotlin Multiplatform

Projects

- **Motification**

  Client: *Personal Project*

  Overview: An Android-to-macOS notification transfer app built from scratch.

  Key Features:
  - End-to-End Encryption: Ensuring secure data transfer between Android and macOS.
  - Android Keystore: For secure storage of encryption keys.
  - Clean Architecture: Separation of concerns for maintainability and scalability.
  - Foreground Service: Ensuring consistent operation even in the background.

- **Sepay**

  Client: *Buckaroo LLC*

  Overview: A point-of-sale app for merchants to track transactions effectively.

  Key Features:
  - Implemented REST API integration for secure transaction data handling.
  - Utilized Android Keystore and biometric authentication for enhanced security.
  - Developed local data management for offline capabilities.
  - Created a custom Android widget for quick transaction insights.

- **Gjirafa Video & VP Player Ecosystem**

  Client: *Gjirafa Inc.*

  Overview: An integrated video platform and SDK ecosystem, focusing on seamless streaming and video playback experiences.

  Key Features:
  - Collaboratively maintained and enhanced the ecosystem for stability and performance.
  - Developed a live streaming feature for Gjirafa Video using CameraX, including live chat support.
  - Integrated Google Billing API for in-app purchases and subscription management.
  - Optimized the VP Player SDK for improved performance, focusing on a smooth playback experience.
  - Ensured interoperability between video streaming and playback components within the ecosystem.

- **Revuto**

  Client: *Async Labs.*

  Overview: A crypto wallet app with focus on security and seamless transactions.

  Key Features:
  - Worked with PIN and biometric authentication for secure access.
  - Managed transaction operations through secure REST API integration.
  - Worked with local storage solutions for offline functionality.
